

Delivering on Commitments.
Building Long-term Relationships

**Providing the insights needed to improve productivity,
analytics and visibility**

Program Management

Program to Project Tracking & Reporting

From greater management visibility to project optimization and more, HGA's solution helps clients make informed decisions – more quickly and accurately than ever before.

Our VistaTRAK™ decision support solution measures key performance metrics to allow you to make informed decisions and provide proactive problem solving solutions to help ensure that projects come in on time and within budget. HGA's objective is to facilitate a decision-making process that delivers high-quality programs that are technically and environmentally sound, affordable, and completed on schedule.

Our solution helps clients monitor and manage the overall picture and provides full transparency of project KPI's, risks, key metrics, costs, resources, and work progress. The web-based system offers reporting dashboards and online document storage, as well as tools for earned value analysis, forecasting/trends, detailed scheduling, and risk/change management and control.

Providing the insights needed to improve productivity, analytics and visibility

Program Management

With VistaTRAK, owners and operators take control of everything so they know what's happening onsite, all the time. This system puts quality control in the hand of the owners and operators, providing peace-of-mind for throughout the project lifecycle. When it comes to integrating multiple data sets with customizable reports and dashboards, the VistaTRAK solution improves the interpretation process by allowing users a complete view of everything.

HGA's VistaTRAK decision support solution includes a document repository and meeting space for project stakeholders. As part of VistaTRAK, our data storage solution will help manage and collaborate all required documentation into one online, central location. Through this solution, project stakeholders can collect and archive required documentation, participate in team discussions, view important announcements, and share team calendars anytime and anywhere from any computer or hand-held device. It is the only system in the country proven to manage, track, and report effectively while providing the most value for program implementation.

We already have the tools in place to easily customize the system for your project needs. Websites for our past projects have been recognized at state and federal levels for their innovation and accessibility, and our methods are quickly setting a new industry standard. HGA's VistaTRAK decision support solution was cited as a finding of merit by the Department of Housing and Urban Development (HUD) in the overall management and monitoring of the LA Hurricanes Katrina/Rita CDBG Disaster Recovery Program.

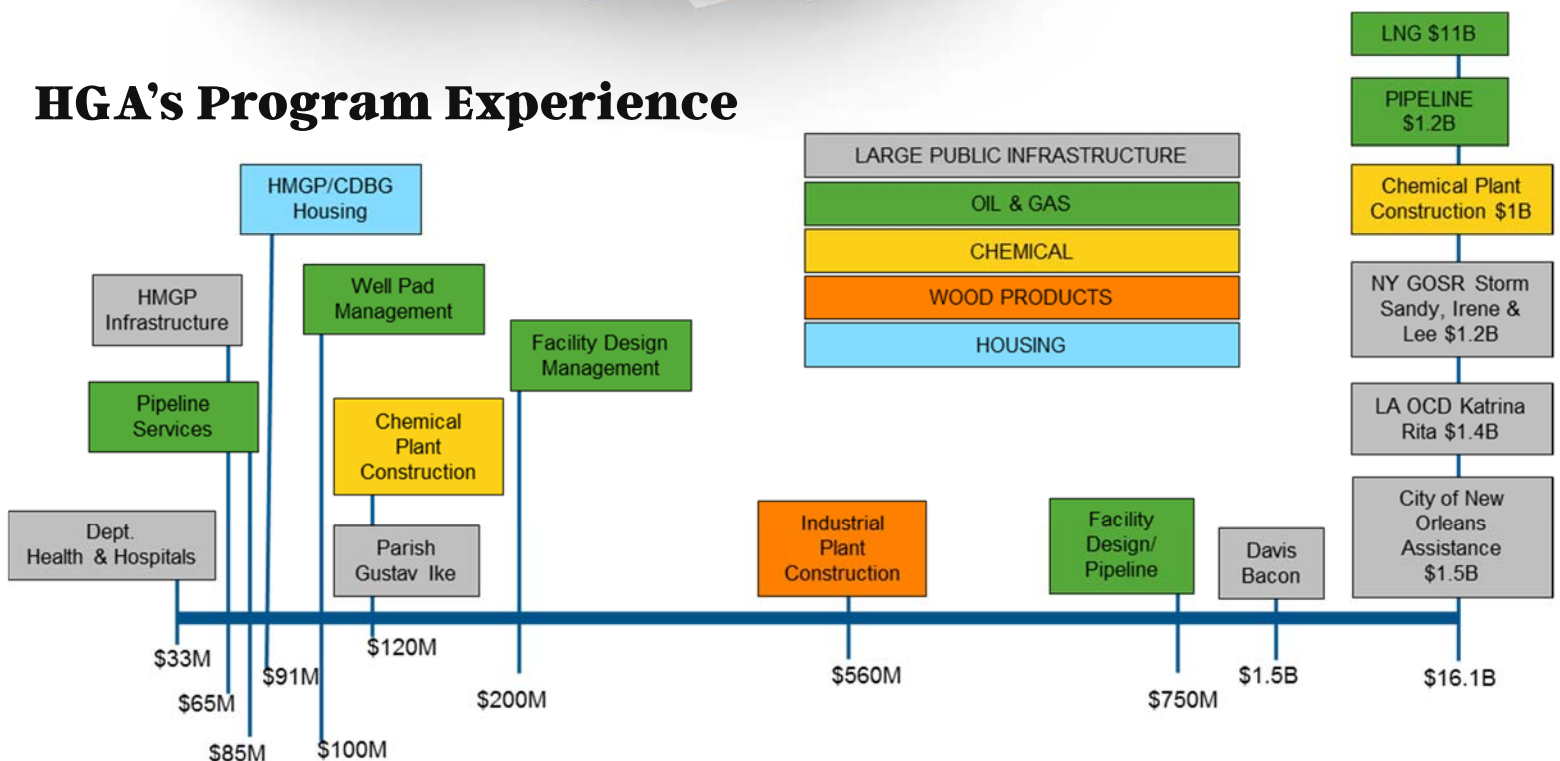

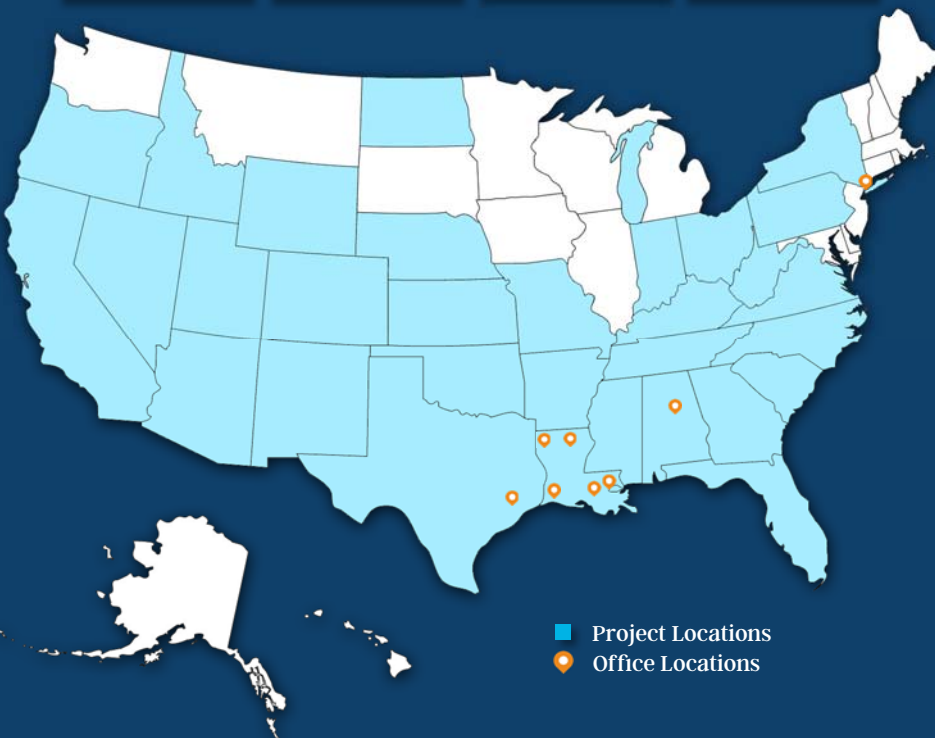

VistaTrak ensures that your project receives the cost and project execution benefits of the following:

- Intuitive interface provides greater management visibility
 - Trend-Historical analysis
 - Current progress & Path Forward
- Team sharing feature ensures timely interaction for improved decision making
 - Increase R.O.I.
 - Mitigates Critical Risks
- Promotes increased accountability and communication
- Online-Browser Access- one-stop source for all progress tracking and reporting
- Storage feature ensures all documentation resides in one location
- Fully customizable to fit your needs
- Canned reporting and data extract capability
